

Featured Project

Houses of Worship

California and Oregon

ArcSine Engineering has worked on numerous house of worship projects throughout California and Oregon. Our services have included working closely with design committees, architects, civil engineers, structural engineers, landscape designers, interior designers, and others.

Work has included power distribution, interior lighting, fire and security alarm systems, exterior lighting which includes parking lots, HVAC, and plumbing design.

Work also included coordinating with specialty theatrical lighting and sound consultants to provide power circuits and general lighting interfacing.

Below is a list of projects ArcSine has completed design for, and been involved in:

Abbey of New Clairvaux—Vina, California
Ascension Lutheran Church—Medford, Oregon
Ashland Methodist Church—Ashland, Oregon
