

Featured Project

Early Beginnings Learning Center

Elk Grove, California

ArcSine Engineering performed mechanical, electrical, plumbing, and lighting design for the construction of a new 5,300-square-foot daycare center.

ArcSine's design for this project included:

- Interior lighting tailored to meet the needs of classroom-style spaces.
- Parking lot and exterior lighting designed to emphasize the building's unique architectural features.
- Power distribution, with an emphasis on safety for the occupants.
- HVAC systems to control spill-over of unwanted odors into child-occupied spaces.
- Air conditioning systems capable of meeting high occupant density requirements, as well as the demands of Elk Grove's climate zone.
- ArcSine Engineering performed construction observation and provided a final punchlist.
